
Marketing Bulletin 93-2020

Date: June 23, 2020

From: Panini Marketing

To: Customer base
Resellers and Distributors

Product: ml:Deal

Subject: mI:Deal new board and Ethernet dongle

Panini hereby communicates a change affecting the ml:Deal intelligent, single-feed check scanner.

The ml:Deal scanner has been produced with a new electronic board since mid-2019.

The watershed serial number for this board is **132000100**: all units with an equal or greater S/N are equipped with the new board.

ml:Deal users using the default production USB-RNDIS mode (Ethernet over USB), with a USB cable, are not affected by the change, as well as those using the ml:Deal with Wi-Fi connectivity, i.e. with the addition of a Wi-Fi dongle (HO.MID-WIFID.N).

ml:Deal users planning to use the ml:Deal with *Ethernet LAN connectivity*, instead, will need to add an Ethernet dongle (**HO.MID-ETHD.N**) to scanners equipped with the new board.

Contact

Please contact your Panini Sales Representative for more information and for Ethernet dongle pricing.

The new ml:Deal Quick Guide covering the Ethernet dongle is already available from Panini Global Technical Services.
